

3D Systems Belgium is looking for a motivated

ENVIRONMENTAL HEALTH & SAFETY MANAGER EMEA (M/F)

About 3D Systems Belgium

3D Systems Belgium, formerly LayerWise, is a dynamic and leading enterprise, specialized in 3D Printing of metal components and part of the international company 3D Systems.

3D Systems is a renowned developer of 3D-printers and a contract manufacturer of 3D printed parts. The synergy of both activities makes us a strong innovation partner for customers in the industrial and healthcare sector.

We believe in a culture of open communication, supporting each other and the value of trust & respect for the individual. The combination of team culture, cool technology, making a difference every day and the ability to learn and grow are key attributes of this small team. High motivation, an authentic care for each other and fun at work is what you see looking at this team.

JOB DESCRIPTION

This hands-on role plans, directs and carries out organization-wide safety and environmental programs in order to ensure a safe, healthy, and accident-free workplace, aligning the global business vision of the Company. Develop and promote sustainable processes that maximizes the safety, environment and health of our employees and contractors and customers. Your initial and main focus will be Belgium, gradually you will extend your working area to the entire EMEA region. While in Belgium you have an operational and advising role, in other EMEA entities your role is to advise.

RESPONSIBILITIES

- Oversees and directs safety and environmental compliance initiatives to maintain compliance with national, state, and local regulations.
- Plans and implements safety policies and procedures in compliance with local, state, and national rules and regulations.
- You act as Secretary in the Belgian Committee for Prevention and Safety at Work ("CPBW").
- Develops and implements programs and policies for monitoring and preventing chemical, physical, and biological hazards.
- Surveys, compiles, and analyzes data relating to occupational and environmental health issues such as chemical exposure, smoke, fumes, noise, temperatures, dusts, vapors, mists, gases, solvents, lighting, and ergonomics which are known or suspected of being real or potential detriments to health.
- Consolidates safety measurements, safety evaluations, and hazardous waste evaluations for all required reporting.
- Guides and checks commissioning of new equipment in organization facilities.
- Develops and implements process for tracking permit requirements including air quality, storm water, etc.
- Serves as technical resource to assist with study and recommendation of control measures for exposure to hazardous materials or conditions.
- Prepares studies and analyses of industrial accident causes and hazards to health. Develops and implements programs and systems to track and evaluate worker injuries. Recommends preventive actions plans and corrective measures.
- Maintains working knowledge of new developments in the industry and government regulations.
- Develops and facilitates training for team members on issues related to health and safety.
- Plans and implements programs to train managers and employees in work site safety practices, fire prevention, first aid, proper use of personal protective equipment, and correct handling techniques for chemicals, toxins, equipment, and other materials.

- Regularly inspects organization facilities to detect existing or potential incidents and health hazards, determines corrective or preventative measures where indicated, and follows up to ensure measures have been implemented.
- Facilitates EH&S audit and certification programs including third-party and annual self-audits. Monitors progress on any remediation steps or findings.
- Assist with due diligence as needed
- Make site visits when necessary to conduct audits or observations related to environmental, health, safety issues
- Anticipate potential business impacts of changing EH&S requirements

PROFILE

- Master degree, preferably in Engineering
- You are trained as a Prevention Advisor level II (according to Belgian regulations)
- Strong background in a manufacturing environment
- You have strong affinity with the technical dimension of safety
- You act as a real business partner, being assertive and diplomatic at the same time
- Good written and oral communication skills
- Must be able to make decisions using ethical reasoning and sound judgment
- Demonstrated ability to negotiate and manage conflicts to satisfactory resolution
- You feel happy in a fast-paced environment and love the dynamics of an international company
- Prepared to travel
- Flexible and solution oriented
- Fluent in Dutch and English

WE OFFER

- A challenging job in a young and dynamic team
- A competitive salary and additional non-statutory benefits
- Career opportunities in a global company with exponential growth
